Progressive Orthodontics was founded with...

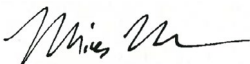

The concept of opening the world of orthodontics to GPs globally in a way that encourages them to provide the highest level of care.

Progressive Orthodontics was founded with the concept of opening the world of orthodontics to GPs globally in a way that encourages them to provide the highest level of care. Over the past 38 years, we have seen our students not only learn the highest level of orthodontics, but also seen how this knowledge has improved every area of their practice. The result has been our students have consistently had thriving practices, able to adapt with ease to any conditions the market has thrown their way.

The pandemic put this to the ultimate test, forcing many offices globally to shut down or greatly modify how they practice. Dentists were forced to dip into their savings, and many lost their practices. Having the ability to rapidly change their practice, and the ability of orthodontics to be done in a creative way, saved many of our students' careers, and allowed them to thrive even in this most difficult of situations.

If you have not added orthodontics to your practice, NOW is the time. Having the ability to adapt to any situation, add income to your practice, treat your patients to a higher level, and thus win the loyalty of these patients is more important than ever. In a post pandemic world, the level of competition has increased to keep long term patients to secure your future and begin to rebuild your savings, and orthodontics is the most effective way to make both goals a reality.

We at POS realize that the demands on your time are greater than ever and have created new learning formats and creative programs to allow you to learn on your time, at your pace, and in a way that fits your lifestyle. With our lifetime free retake policy, you can continue to learn in any of our formats for the rest of your life for free, ensuring that you are always on the cutting edge and able to successfully treat any case with confidence. I hope you decide this is the year to join the over 9000+ dentists globally that have seen how POS can change your career.

Miles McGann, CEO

IN-PERSON

Attend the full series in-person for both lecture and hands-on.

HYBRID

The best of both worlds! Attend in-person for hands-on training and study the remaining material online.

VIRTUAL CLASSROOM

Combine live interactive webinars with self-paced online study.

SELF-STUDY

Study the full series online at your own pace, under the guidance of an instructor.

TRADITIONAL ORTHODONTICS

Comprehensive Series

Treat 90% of the patients in your practice with the most comprehensive training series in the industry.

Over the past 38 years, Progressive Orthodontics has established itself as the world's #1 orthodontic training program. With over 100 cases used for instruction, you will not only master the principles, but confidently apply them.

With our Traditional Orthodontic series, you can feel confident you are learning orthodontics at the highest level in the world.

BENEFITS OF TRADITIONAL ORTHODONTICS

CONTROL EVERY SITUATION.

With a comprehensive understanding of orthodontics, you'll have complete control from start to finish on even challenging cases.

SUPPORT WHEN YOU WANT IT.

The robust education will empower you to successfully treat any orthodontic case, either on your own, or with any level of our support.

TUITION

- 12 payments of \$1,500
- Prepay for the series and save \$2,700!
- Call for our many available discounts and staff rate

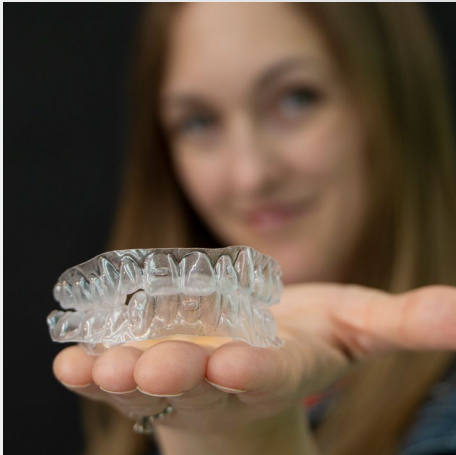

LEARNING FORMATS

- **In-Person:** 12 four-day seminars
- **IAT Hybrid:** 4 three-day seminars + self-study
- **Virtual Classroom:** 30 three-hour webinars + self-study
- **Self-Paced:** Videos + instructor support

ALIGNER+ ORTHODONTICS

Mini Series

TUITION

- 4 payments of \$1400
- Prepay for the series and receive a free hands-on kit (valued at \$1200)
- Call for available discounts and staff rate

LEARNING FORMATS

- **In-Person:** 4 three-day seminars
- **IAT Hybrid:** 1 three-day seminar + self-study
- **Virtual Classroom:** 10 two-hour webinars + self-study
- **Self-Paced:** Videos + instructor support

Our education
and mentoring are
compatible with
any aligner system

Aligner+ is an educational, mentoring, and treatment planning program for dentists.

A solid educational foundation, coupled with the support of a trusted mentor, will ensure your success on every aligner patient.

BENEFITS OF ALIGNER+

MENTORS PROVIDE A SOLID PLAN. Use step-by-step plans and instructor guidance to ensure every important detail is analyzed before starting treatment. Following a predictable plan helps you maximize efficiency and profits.

FULL PROTECTION. Be confident and protected on every case you treat. Do aligners the right way and meet the American Board of Orthodontics' standard of care. No shortcuts.

What do I need to participate?

You will need extra kit materials to participate in the hands-on portions of each program:

- **Traditional Series:** From Seminar 2 (or Module 1)
- **Aligner® Series:** At Seminar 2

Kits include instruments as well as sample sizes of materials, and can be bought prior from Progressive Dental Supply. If you have the instruments, you do not need to purchase them again. For a list of the products, please contact our staff.

Purchasing good orthodontic supplies should be easy and cost effective. For the past 35 years, Progressive Dental Supply sources recommendations from experienced instructors, allowing you to find the correct products the first time. We offer high quality products at very competitive prices and only carry one of each product to keep ordering simple.

Let's Practice!

In addition to developing strong diagnosis, analysis, and management skills, you will get to practice techniques under the supervision of experienced instructors. We teach a system that you can use in your practice right away and encourage you to start cases immediately, while in the program.

POS Family Worldwide

The Progressive Orthodontics Difference

Empowering dentists through the stability of orthodontics since 1984.

As our number of graduates continues to grow, we remain dedicated to our core beliefs:

Lifetime Support, Commitment to Dentists, Predictable, Honest & Practical

Progressive Orthodontic Seminars
Nationally Approved PACE Program
Provider for FAGD/MAGD credit.
Approval does not imply acceptance by any
regulatory authority or AGD endorsement.
May 2, 1988 to May 31, 2023
Provider ID# 208682

Progressive Orthodontics and Progressive Dentistry is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Progressive Orthodontic Seminars designates each day of seminar for 8 hours continuing education credits.

Traditional Orthodontics Curriculum

Gain a comprehensive understanding to manage 90% of your orthodontic patients

SEMINAR 1

Clinical evaluation, records, cephalometrics (radiology) & model analysis

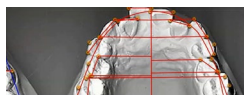

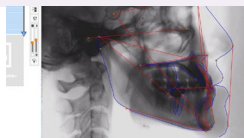

- Classification and analysis of 7 patients and digitization of records
- Initial clinical exam, setting goals and limitations
- Lateral and frontal cephalometric tracing and digital model analysis with SmileStream
- Introduction to dental VTO (Visual Treatment Objective) as a tool to support the treatment decision
- POS philosophy and management of SmileStream diagnostic cloud-based software

SEMINAR 2

IP Appliance®: Individual Patient – How to use it

- Bracket variations, design and ordering IP® appliances with SmileStream
- Archwire ligature tie: Different types of ligatures
- Direct bonding vs indirect bonding
- Start orthodontic cases: How to prepare the patients and your staff
- Hands-on: banding and bonding, tie-in techniques and how to use coils

SEMINAR 3

Diagnosis - Theory of orthodontic appliances and auxiliary appliances

- Bracket Torque Range (RBT) for predictable incisor positioning
- Appliance design and torque selection to achieve the best dental movement
- Advancement and Retraction Limits - Skeletal and Dental resistance
- Introduction to Dental VTO and Extraction Diagnosis in SmileStream
- Extraction vs non-extraction criteria and treatment plan selection
- How growth affects treatment and how to use it
- Auxiliary appliances: headgear, reverse-pull headgear and rapid palatal expander (RPE)

SEMINAR 4

Extraction diagnosis and mechanics

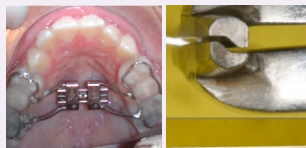

- Most common extraction sites
- Extraction of upper first bicusps
- Extraction second bicusps upper and lower
- Extraction of laterals
- Extraction of second molars
- Extraction vs non extraction
- Diagnosis of extraction cases
- Appliance design and full treatment discussion of extraction cases
- Treatment concepts, mechanical principles and materials: theory and cases
- Introduction to growth theory and how it relates to orthodontics

SEMINAR 5

Mild Class III Management, Growth in Class II Cases & Cuspid Impaction Retrieval

- Intro to Impacted Teeth, Dentofacial Orthodontics and Multiple Option Consultation
- Identifying Skeletal Resistance and What This Means to Treatment
- Anchorage Planning with Technology for Consistent Finishes
- Management of Class III and Class III Tendency Cases
- Growth in Class II Cases & Treatment of Deep Bite Cases

SEMINAR 6

Mixed Dentition Diagnosis, Taking Growth into Account & Unconventional Extraction Sites

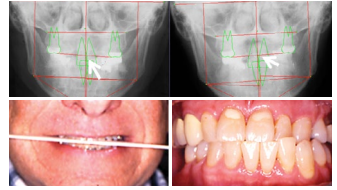

- When Extraction of Molars or Lateral Incisors May Be the Best Treatment
- Predicting and Treating Incisor Advancement and Protrusion
- Management of Protrusive Growing and Non-Growing Cases
- Mixed Dentition Treatment Plans and Adding Growth to Your Predictions
- Hands-On: Exercises on TPAs and Finishing Bends

SEMINAR 7

More Mixed Dentition, Treating Asymmetry, & Managing Biprotusions

- Introduction to Treating Asymmetries (Dental and Skeletal, Functional Shift, and McGann Frontal Cephalometrics with Computer Analysis)
- Managing Biprotusions in Growing and Non-Growing Patients
- Lower Lingual Arches, Utility Arches and Anchorage Planning
- Using Growth to Your Advantage
- Hands-On: Exercises including Cervical Headgear, Utility Arches, and Coils

SEMINAR 8

Asymmetry in Adults and Mixed Dentition Cases & Dento-Aveolar Bone Remodeling

- Establish a System to Diagnose and Treat Asymmetric Cases
- Labial Cortical Bone Remodeling for More Non-Extraction Treatments
- Correct Major Class II and III without Cooperation or Orthognathic Surgery
- Introduction to Skeletal Anchorage: Apply Forces to the Skeleton, Not Teeth
- Bone Modifications to Control Vertical and Transverse Dimensions

SEMINAR 9

Basic Skeletal Anchorage and Surgical Application to Control Vertical and Lower Minimal Anchorage & Gingival Display Protocols

- Dentofacial Orthodontics: Do More Than 'Just' Straighten Teeth
- Skeletal Anchorage and Surgical Application for Easier and More Effective Ortho
- Bone Plates versus Ortho Anchors (TADs) with Mechanics for Each
- Deep Bite, Gingival Display and Occlusal Plane Cants are No Longer a Problem!
- Hands-On: Skeletal Anchorage Exercises on Your Skull Model

SEMINAR 10

Intermediate Skeletal Anchorage and Surgical Application to Correct Severe and Growing Class II Patients

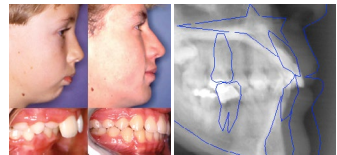

- Class II Growth Management
- Maximal Retraction Is No Longer an Issue
- Severe Midline Correction with Skeletal Anchorage
- Management of Severe Impactions
- Coordinating with the Maxillofacial Surgeon, Periodontist, or Do It Yourself

SEMINAR 11

Advanced Case Diagnosis Including Orthognathic Surgery Alternatives

- Orthodontics versus Dentofacial Orthodontics versus Orthognathic Surgery
- Managing Growth and Severe Skeletal Issues in Class II Cases
- Retraction No Longer Means Increasing or Creating Gingival Display
- Severe Skeletal Class III Cases & Lower Retraction with Bone Remodeling
- Surgical VTO Predictions, Treatment Plans, & Working with the Surgeon

SEMINAR 12

Putting It Together: Periodontics, Maxillofacial, TMD, Implantology, & Orthodontics

- Diagnosing and Planning Multidisciplinary Cases that YOU Can Now Manage
- Exam of 1000+ Ortho Principles and Present Two of Your Cases
- Improving the Prognosis of Periodontal and TMD Cases with Orthodontics
- Building Ridges with Orthodontics before Implant Placement
- Surgery and Corticotomies to Overcome Skeletal Resistance and Extend Movement

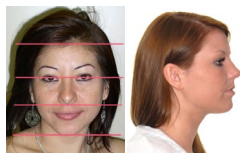

ALIGNER+ CURRICULUM

Fundamentals for Clear Aligner Success

SEMINAR 1

Foundation for Successful Clear Aligner Cases

- Case Selection and Treatment Planning: Class I Crowding, Mild Posterior Crossbite
- Foundations of Orthodontic Diagnosis
- How to Properly Diagnose and Design your Aligners for Success
- How the Skeletal Pattern Influences Your Success or Failure
- How Facial Traits and Tooth Movement Affect Facial Esthetics
- How to Properly Take Records to Meet the Standard of the American Board of Orthodontics (ABO)
- Aligner+ Consulting and Mentoring to ensure your Success

SEMINAR 2

Setup Evaluation, Use of Engagers, & Hands-On Workshop

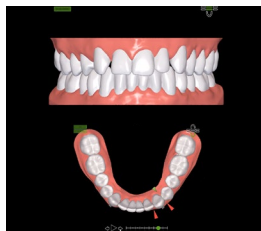

- Class II Non-Extraction Cases
- Understanding Tooth Movement—Torque, Intrusion, Extrusion
- Engagers, IPR and Other Tools—Why, When and How
- Why Aligners Don't Fit and How to Fix Fit Issues
- How to Communicate with the Lab Technician for an Effective Setup
- Rationale for Adding Brackets to Certain Cases for Maximum Success

SEMINAR 3

Revisions & Moving Beyond Simple Cases

- Diagnosis and Treatment Planning of More Severe Malocclusions
- Open Bite Treatment Planning
- Reciprocal versus Segmental Anchorage
- Segmental versus Sequential Tooth Movement
- Proper Planning for Successful Extraction Space Closure
- Class I and Class II Extraction Cases
- Revisions: When and How to Make Adjustments to the Treatment

SEMINAR 4

Solutions to Common Challenges, Retention, & Control on Complex Cases

- Manage Any Situation: Solutions to Common Problems with Aligners
- What to Do if Aligners Pop Off or Are too Retentive
- How to Manage Teeth not Rotating or Extruding as Expected
- Managing Inadequate Root Movement, Black Triangles and Posterior Open Bite
- Which Cases to Avoid and Which You Can Treat with Great Control
- Helping More Complex Cases (Mild Class III, Deep Bite, Distalization and More)
- Use of Accessories (Buttons, Elastics, Distalizers)

Brackets Too?

You will also gain a basic knowledge of bracketing to help you when patients are not compliant or if you need more efficient tooth movement.

You'll soon be able to

- Maintain and create proper occlusion
- Move teeth predictably and efficiently
- Close spaces (extraction and non-extraction)
- Manage patients who do not wear their trays
- Meet the ABO orthodontic standard on all cases
